Personal Information

I am Zheng Chen, a specially appointed assistant professor at SANKEN, Osaka University, working in the Sakurai & Matsubara Laboratory where I lead the **AIBIC** group (AI for Bio Informatics and Care). I received my M.S. (October 2019) and Ph.D. (March 2022) from the Nara Institute of Science and Technology (NAIST), under the supervision of Prof. Hirokazu Kato and Prof. Shigehiko Kanaya. My research pursues *reasonable, reliable* automated biomedical systems that build on prior biological knowledge and real-world constraints. I am particularly interested in bio-signals, time-series data, and biological networks, and in closing the gap between AI advances and their adoption in healthcare and industry.

Feel free to contact me at chenz@sanken.osaka-u.ac.jp.

Research Interests

Bioinformatics · Machine learning for biomedical data · Time-series analysis · Biological network mining

Education

- Ph.D. in Information Science, Nara Institute of Science and Technology (NAIST), Japan
2019–2022
- M.S. in Information Science, NAIST, Japan *2017–2019*

Academic Positions

- Specially Appointed Assistant Professor, ISIR (SANKEN), Osaka University *Dec. 2022 – Present*
- Postdoctoral Researcher, Osaka University *Feb. 2022 – Nov. 2022*
- Research Trainee, RIKEN Center for Computational Science (R-CCS) *Oct. 2021 – Mar. 2022*
